EXPERIENCE

Internship, Department of Migrant Workers - DMW **Feb 2026 - May 2026**

- Architected and deployed a standalone, local-network Paperless Queuing System using SQLite to streamline and optimize real-time client routing between DMW and OWWA offices.
- Processed and consolidated large-scale demographic datasets into structured, highly organized spreadsheets, improving record accuracy and access efficiency.

TECHNICAL PROJECT

Queue Management System **Feb 2026**

https://queue-system-74c9f.web.app

Role: Solo Developer

Tech Stack: *React, TypeScript, Vite, Tailwind CSS, Lucide React, Firebase Firestore, Firebase Authentication, Firebase Hosting, React Router DOM*

- Architected and deployed a real-time paperless queuing system using Firebase Firestore, updating the public TV board instantly the moment an officer calls a client.
- Implemented Firebase Authentication and role-based routing with React Router DOM to separate access between admins, officers (DMW/OWWA), and the public kiosk/TV board.
- Built a fully responsive, dark-mode UI with Tailwind CSS and Lucide React, eliminating manual paper handling and physical wait times.

K-UMAP Health Analytics **Dec 2025**

https://k-umap.onrender.com

Role: Solo Developer / Data Analyst

Tech Stack: *Python, Flask, Flask-CORS, Gunicorn, NumPy, Pandas, Scikit-Learn, UMAP-learn, SciPy, Optuna, Joblib*

- Built a dimensionality-reduction and clustering pipeline (UMAP + K-Means) to analyze student clinical health datasets at Isabela State University Echague Infirmary, optimizing cluster separation with Optuna.
- Deployed the pipeline as a Flask REST API on Gunicorn with a CORS-enabled backend, delivering actionable insights for campus health administration.

J.P. Lamug-Daquioag OB-GYNE Clinic Website **Sept 2026**

https://j-p-lamug-daquioag.vercel.app

Role: Solo Developer

Tech Stack: *TypeScript, HTML, API, Chatbot*

- Designed, developed, and deployed the official clinic website for J.P. Lamug-Daquioag OB-GYNE Clinic, establishing its first online presence.
- Integrated an API-driven chatbot to support patient inquiries and improve engagement.
- Expanded reach for the clinic's healthcare services in San Agustin, Isabela through a fast, mobile-friendly TypeScript build.

Stock Market News Intelligence Analyzer **Aug 2026**

Role: Solo Developer / Automation Engineer

Tech Stack: *n8n, Google Gemini (AI/LLM), RSS Feeds, REST APIs, JSON, Discord Webhooks, Cron/Scheduled Triggers, JavaScript*

- Built an automated financial-news monitoring pipeline in n8n, consolidating stock-market news from multiple RSS and REST API sources on a scheduled cron trigger.
- Applied Google Gemini (AI/LLM) to analyze and filter incoming stories, delivering real-time, formatted insights to Discord via webhook and removing the need to manually monitor news sources.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Science (Major in Data Mining) **Aug 2022 - Jul 2026**

Isabela State University - Echague Main Campus

- Final GWA: 1.518

Certificate of Eligibility **Jul 2026**

Honor Graduate Eligibility - Cum Laude
PD - 907

Certificate of Completion **Feb 2026 - Apr 2026**

Accenture Technology Academy - Salesforce

Civil Service Eligible **Mar 2024**

Civil Service Eligible - Professional

KEY SKILLS

Developer Stack

- Python
- JavaScript / TypeScript
- C++
- HTML/CSS
- SQL

Web & cloud

- React, Vite, Tailwind
- Firebase (Auth, Firestore, Hosting)
- Flask, REST APIs
- n8n automation

AI & Modern Tools

- AI-Assisted Development
- AI Debugging
- Prompt Engineering
- Claude, Gemini, Codex

Office & productivity

- MS Office Suite (Excel, Word, PowerPoint)
- Data entry
- Documentation
